Screen 5: Edit Profile

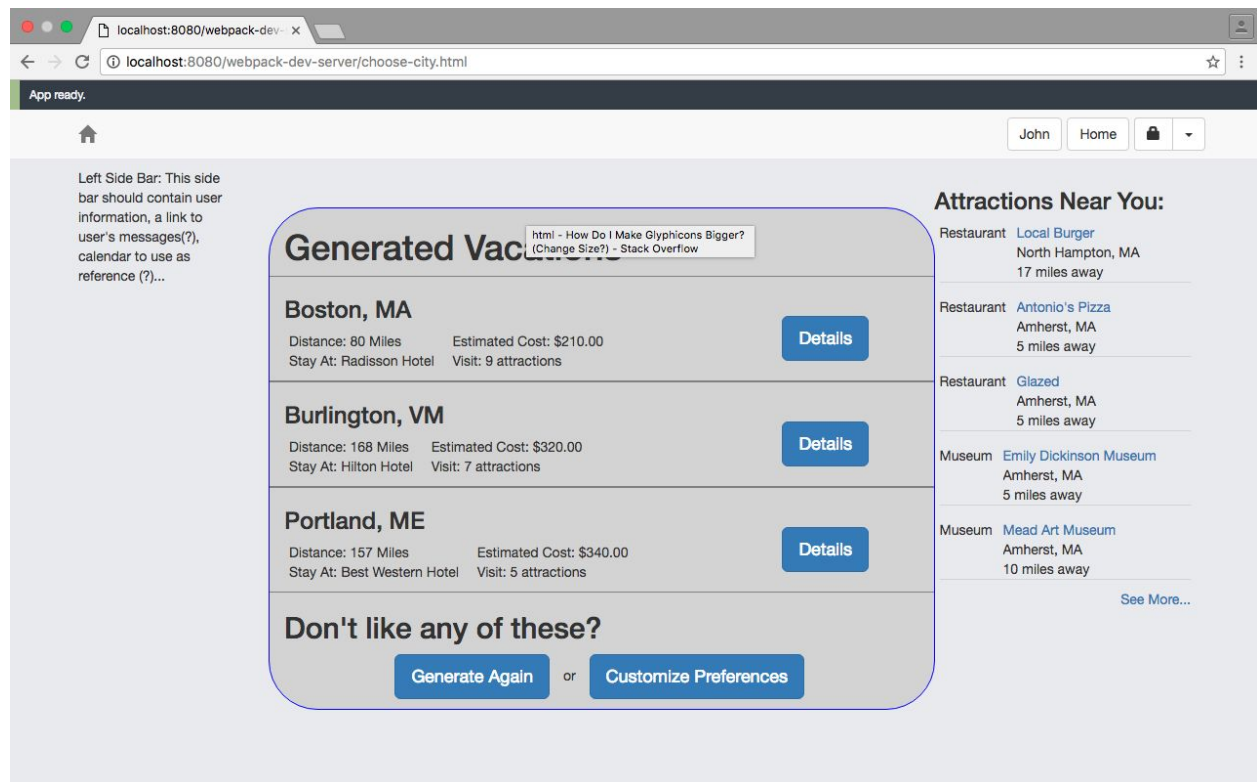

Screen 0: Main Page

This is the Main landing page when a user is logged in. The center column has two main features, the quickly generate trip panel, and the feed of trips generated near you. The quick generation panel gives you forms for the start date and end date, and upon clicking the generate button, will take you to the choose a city modal, then to the full trip details page. Upon clicking the customize button, you will be brought to the customize page, allowing you to further tailor your trip preferences. The feed of trips generated near you will suggest trips that were generated for others in your area. Clicking on more info will take you to the full trip details page as well.

Screen 1: Choose a City (Modal)

This screen pops up after initial generation request, bringing up a modal with 3 possible vacations, with brief summaries of each one (in functional app, when this screen shows up the rest of the page will be greyed out using JavaScript). The user has the option of viewing any of the three vacations in more detail (bringing the user to the Full Trip Details page). If none are satisfactory, the user can generate a new set of vacations or the user may choose to customize generation parameters (bringing the user to the Customization page). Visible here as well is the right side bar, which contains nearby attractions that the user may find interesting, with available links to each one.

Screen 2: Full Trip Details

Center column: Displays a single vacations details. This is where the user is taken after a Trip is generated. A user can take notes on features of the website as well as re-generate specific types of activities, restaurants, or accommodation.

We see the City, schedule, a link to google maps for directions, and the accommodation. A user can re-generate the accommodation or take notes. We also see a list of recommended restaurants, activities where you can also take notes.

The screenshot displays a web application interface for trip details. At the top, a navigation bar includes a home icon, a user profile icon, and buttons for 'John', 'Home', and a lock icon. The main content is divided into three columns. The left column, titled 'Your Profile', shows user information for Tim Richards, including contact details and a list of recent trips. The center column, titled 'Boston, MA', displays trip details such as arrival and departure dates, transportation mode, and a list of recommended restaurants. The right column, titled 'Attractions Near You', lists nearby restaurants and museums. The bottom section of the center column contains a 'Notes...' input field and a 'Regenerate' button.

Screen 3: Customization

There are several default settings for every account. In order to see relevant results, the user must adjust preferences to their liking. There is a panel with a text field for adjusting the location from which the user would like to travel; the default is your current location. The next panel includes various attractions that the user can express interest in. There will be more options in later versions, as well as more specific options. The next two panels will allow you to select only one option at a time. Once the user is satisfied with the preferences, they can save changes with the button in the top-right corner.

The screenshot shows a web browser window with the URL `localhost:8080/webpack-dev-server/customize.html`. The application is titled "App ready." and features a user profile "John" with a "Home" button and a dropdown menu. The main content area is titled "Customizations" and includes a "Save Changes" button. The page is divided into several sections:

- Your Profile:** A sidebar menu with "edit" and "Personal Information" options. The profile details for Tim Richards (413) 867-5309, Western Mass, are listed. Recent trips include "To: Boston for 2 days" and "To: NYC for 4 days". Usage statistics show 2 trips taken, 6 trips generated, and 7 days travelled, with a "See More..." link.
- Customizations:** The main content area with a "Save Changes" button and a subtitle "This is where you can set the defaults for your account."
- Where are you starting from?:** A section with a location input field set to "Boston, MA" and a note "If not from your current location."
- What are you interested in?:** A section with a "Mark all that apply." instruction and a grid of interest categories: Restaurants (selected), Museums, Natural Wonders, Historical Landmarks, and Natural Wonders.
- How do you want to travel?:** A section with a "By Plane" (selected) button and options for "By Bus" and "By Car".
- What is your preferred accomodation?:** A section with an "AirBnB" (selected) button and options for "Hotel" and "Hostel".
- Attractions Near You:** A sidebar list of nearby attractions, including "Local Burger" (North Hampton, MA, 17 miles away), "Antonio's Pizza" (Amherst, MA, 5 miles away), "Glazed" (Amherst, MA, 5 miles away), "Emily Dickinson Museum" (Amherst, MA, 5 miles away), and "Mead Art Museum" (Amherst, MA, 10 miles away). A "See More..." link is provided at the bottom.

Screen 4: Generated By User

The center column of this page provides short summaries of several trips generated by the user. Details include the start location, destination, start and end date, and a short description that includes some of the planned locations. Each summary also includes a button to go to the full trip details page for that trip. There is also a button to load more previously generated trips.

Screen 5: **Edit Profile**

The center column is where the user would update their profile information, which includes changing their name, username, password, email and other things. The user can manually change this information by entering the correct info into the different input boxes. Both buttons on the bottom of the page and in the top right corner are used to then save any changes made. In the left column there would be any profile picture that you might want, your usage statistics along with other ways to get around the website. Also in the right side bar contains nearby attractions that the user may find interesting, with available links to each one.

The screenshot shows a web application interface for editing a user profile. The layout is divided into three main sections: a left sidebar, a central content area, and a right sidebar.

Top Navigation: A home icon and a user menu containing 'John', 'Home', a lock icon, and a dropdown arrow.
